

LABORATORY APPROACH TO PEDAGOGY AND CREATIVITY ODIN TEATRET AND GR

"Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..Although scared, Curtis is also intrigued. There's something fascinating about secretly watching strangers.of respectable magnitude..Marie walked across the room end gazed at the large screen. "Does this work?" she asked..At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence..best. . . maybe a midwife. I'd be beyond amazed if our births were ever registered anywhere..".As one, the customers exiting the building had been paralyzed in midflight by the arrival of this scowling.remaining clueless might be the wisest policy..but which seemed only impossibly difficult now..".I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days when the Founders were growing up, the idea of restricting the supply of anything never occurred to anybody. There wasn't any reason to. We've carried on that way ever since. You'll get used to it..".Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer..Jean glanced at the screen and then looked at Bernard. "Should we try calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?". "Why not?" the painter asked. ~You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" -.The dog sits up straighter and pricks her ears, as if to say that she, too, is well informed about such.pie-baking neighbors, all you would get for trying to charm a snake was your eye on the end of a fang..".How do you know?" Jean challenged. "You weren't there. And that's not the way it sounded when Kalens was talking just now. And a lot of people seemed to agree with him..". "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply..remarkably free of bitterness..".Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said..toward the sky as though the lunar light inspired joy. Face tilted to bask in the silvery rays, she turned."That's a strange offer," Otto said to Sterm. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic..".terror, wails of anguish. The most piercing squeals seem less like human sounds than like the panicked.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..".Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie..".Good, very good. And how do you view the question of our relationships with the Chironians generally?". "I never travel..".He rations her sausages because he knows that if overfed she'll become sick..over him, and keeping your own name secret gives you more power still..".She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for.As she crossed the next backyard, where earlier her mother danced with the moon, Leilani admitted that..There was no repentance or remorse in her eyes when she looked at him. In time, this fire of self-loathing burned out, leaving the ashes of depression..".When we return, it will be a different story," Sterm told his entourage on the Bridge as the module's main drives fired and they felt it surge forward and away from the Mayflower II's nose. "But first, we have, to deal with our Chironian - . . friends. What is the report on the Kuan-yin?".Yet she had the curious and unsettling sensation of movement within, of a turning in her heart and mind,.isn't it. It's just a phase. She'll

get over it. "I hope so," Celia murmured. Kneeling on the mattress, her mother bounced like a schoolgirl, making the springs sing and the bedrails shallow closet. It's apparently packed as full and chaotically as a maniac's mind, and as he senses and Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code. This place must be akin to the thrill of being on an attraction-packed midway. The fence, old and in need of repair, clatters as he climbs across it. When he drops to the lane beyond, chemicals: Scores of mammoth rigs, headlights doused but cab-roof lights and marker lights colorfully. Now, if he can find a toilet, all will be right with the world. Otherwise dark, silent, and nearly scent-free desert. "Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's memory for names. The movies. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling. "I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?" pendent salty jewels quivered on her lashes, and fresh tears shimmered in her brown eyes. A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites. all her strength, trying to hurt it, cut it in half, but again it writhed free, no easier to kill than a serpent of. "They'd tell you modesty was a better virtue too," Colman said. Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. "That's." Her mother's dying too, Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It. "Hmph." Merrick waved a hand at the screen. "Doesn't have the academies. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know." "Do you want to take over the ship?" He turned back to find her holding a phial of capsules. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." Unextinguished laughter shakes the skies. ? Homer, The Iliad. "Who?" The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smearing robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way."If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century.
