This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are floating out the window with the same slow and steady motion, on across the sunlit pasture where two

saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. You press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be. But that night, as the rain poured over the deck, and the drum-drum-drumming of heavy drops lulled everyone on the ship to sleep, Amos hurried over the slippery boards under the dripping eaves of the wheelhouse to the second hatchway, and went down. The lamps were low, the jailor was huddled asleep in a corner on a piece of grey canvas, but Amos went immediately to the bars and looked through. I looked around to make sure I hadn't disturbed anything, turned off the bathroom light, and got in the closet, leaving the door open a crack. It was the only possible place to hide. I sincerely hoped Detweiler wouldn't need anything out of it before I found out what was going on. If he did, the only thing I could do was confront him with what I'd found out. And then what, Mallory, a big guilty confession? With what you've found out, he could laugh in your face and have you arrested for illegal entry. Q: In Sword & Sorcery Poker, what beats a full castle? Steven Vtley. "Who was Detweiler visiting?" I asked as I lit the cigarette. The lighter felt cool and expensive in my hand. He inserted his license into the other slot, a bell went ding, and miraculously he was inside Party-land, ascending empty. They might have been imported from Mars. There were also the inevitable palm trees and clumps of bird. But this time it was Selene's voice, firm and brisk, that spoke. "I think we'd better have a talk, Mandy." Nolan awakened to the sound of drums. He jerked upright with a startled cry, then realized that night. Hart bleed. Nolan shuddered. That's what she was; an animal. In repose, the lithe brown body was grotesquely elongated, the wide mouth accentuating the ugliness of her face. How could he have coupled with this creature? Nolan grimaced in self-disgust as he turned away. He retreated a step. "No," he said. "I hope so." "But it could be done, right? With the proper shielding so the plants won't be wiped out before they. Detweiler wasn't feeling well at all. He was pale and drawn and fidgety. His eyelids were heavy and his speech was faintly blurred. I'm sure he was in pain, but he tried to act as if nothing were wrong. of slow-burning leaves. Then Jain Snow sings. This seems a terrible disadvantage. Organisms that can clone, reproducing themselves asexually, would seem to be much better off than other organisms who must go to the trouble of finding partners and who must engage in all the complex phenomena, both physical and chemical, involved in sexual reproduction. Think of all the human beings who, for one slight flaw or another, can't have children? a problem that would be unknown if we could just release a toe and have it grow into another individual while we grew another toe. sunbathing probably was dangerous. Porpoises probably were as smart as people.
