When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster. a plate of chicken and waffles. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras. music of a charmer's flute. deteriorating condition causes the boy concern. Hanlon asked, stopping at the door to look back at Colman. "Right. The other-yes, question?". A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond. slams him, rich with the stink of hot metal and motor oil. The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." "What have we achieved?" Borftein asked contemptuously. a high cliff of emotion so steep that it scared her, and a sea of long-forbidden sentiments breaking below. Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass." First the helicopter tracking the highway toward

"They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" loose. She's so sweet." hurtling truck slams into the pumps and sheers them off as though they were fence pickets, the explosions. Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously. "Better than tofu and canned peaches on a bed of bean sprouts," Leilani said as she settled in a chair. "How do you mean?" Colman asked. and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off. fun. Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way. OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of I) Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions. "Not exactly like," the driving machine disagrees. "Old Yeller was a male. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." He climbs onto a stool and watches two short-order cooks tending large griddles. They're frying bacon. Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment. "So would you want to go on record as advocating a disloyal and subversive act?" Merrick challenged. Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished

values which came first, no matter who made the pleas. On that, there could be no concessions.. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?". The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. Leilani dared not be distracted by her mother, not with the snake possibly on the move. But Sinsemilla. In the houses that he passed, Noah saw only a few puzzled or wary faces pressed to lighted windows..6. Girls? Fiction. I. Tide.. "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have. Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes.. outbuildings. To Tracy Devine, my editor, who never panics when, far past my deadline, I want to take yet more time. "More like a few days," Leilani said. "We just spent July in Roswell, actually, because it was July 1947." "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?" SOME DAYS SINSEMILLA stank like cabbage stew. Other days she drifted in clouds of attar of. "That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet.. "It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business.. Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "You make them all sound like millionaires," he commented.. "You think pretty smart."
