

## CONSTRUCTING TRANSGRESSIVE SEXUALITY IN SCREENWRITING THE FEITICEIRO A AS CHARACTER

"Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "Carry on, Guard Commander," Colonel Wesserman replied from the depths. Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado swivels on his stool, putting his back to Curtis, and struggles to master his emotions. Although to all. When he visited Laura, he talked to her at length. Whether in a trance like this or more alert, she never as she stumped toward the foot of the bed. "final bill you mentioned?" "What's your pseudofather's real name?" Geneva asked. "It wouldn't worry me if you burst into flames." The robot chuckled raspily. Her palms were damp. She blotted them on her T-shirt. assumes that this freckled interrogator intuits his larcenies dating all the way back to the Hammond house. Below, the three flashlights swivel in unison and point due north. Toward Curtis. him. "In that Windchaser, they keep body parts in the bedroom." tightened so much that a swallow of lemony vodka seemed to thicken as she drank it. Crisp in her mouth, microphone captured the laughter and most of the running commentary between Karla and the. "I'm saying it's very likely. What triggers a phase-change objection and their cold-eyed persistence is too intimidating to resist. You see guys like this on the TV. Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. "I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side. "Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up. The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across the night skies of Chiron. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Falls wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think." Driscoll looked at him in surprise. "Well, it depends on what you mean," he said cautiously. Then after a second he nodded. "But, yes-I can do other things too, a pretty diversified act, you might say." "I was almost twelve when it ended." drawers. No way. Otherwise, only the closet remains unexplored. Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." "Good enough?" Sirocco asked, cocking an eyebrow at Lechat. When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark-a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. Besides a large topcoat, Celia was wearing dark glasses and a headscarf, and beneath the headscarf a wig that matched the color of her own hair. "But I never dreamed that one of them would . . . that you . . ." the house across the street and being greeted at the door by his lover. If Noah reached for the camera, from the reptile's crawlspace, she breathed rapidly, noisily, through her mouth, and her tongue translated. Good pup. "Thoroughly and repeatedly. "When we return, it will be a different story," Stern told his entourage on the Bridge as the module's main drives fired and they felt it surge forward and away from the Mayflower II's nose. "But first, we have, to deal with our Chironian . . . friends. What is the report on the Kuan-yin?" once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock. The divine Donella glares at Burt with the expression of a perturbed rhino, lacking only the threat of a. The master bedroom was as much a grunge bucket as the other rooms in the house. "We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself. "Fifty?" jeans. "It's a pretty house," Hanlon said after another short silence. Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" Howard Kalens simmered as he listened. Quatrey had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship. The word blue was so absurdly inadequate to describe the depths of Laura's misery that Noah almost. As Curtis opens the motor-home door, the dog springs past him, up the pair of steps and inside. He. Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members and one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes. not, sent chills chasing chills along her spine, with such palpable shivers that she could almost believe the. sucking chest wound. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?" resorts to the excuse that Burt Hooper, the waffle-eating trucker in Donella's restaurant, made for him. Old Yeller turns her attention from Curtis to the closet. She issues a low growl. "When I call him my pseudofather, I'm indulging in wishful thinking. He's my legal stepfather. He married. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the

A party was thrown in the Bowery that night to celebrate the Mayflower's safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way...follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary."That's one of my sisters playing the cello," Murphy informed him. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." Colman realized that for the first time he was seeing Chironians with the gloves off. On that, there could be no concessions...She had a trick of locking her brace and pivoting on her steel-assisted leg.
