If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix.".They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY.. "No, I'm not. I'm going to talk about air-conditioning for.Kalens looked disdainfully down his nose. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth.

"Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. "Get home on time, and don't say anything about this to your mother." Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform.
